TECHNICAL CONSULTANCY ACTIVITIES, RESEARCH AND ADVANCED SERVICES

Actisa is a **technical consultancy** adapted to the new demands of society, when new lines production are required to be open, expanding the traditional fields of **civil engineering and architectural activities**. That is why actisa includes **research, innovative and development activities**, with a clear **outsourced vocation**.

www.actisa.net

Moreover, **new forms of infrastructure management** require a new perspective in the preparation of projects and construction management, using new analysis to emphasize in the **feasibility and optimization** of such infrastructures.

Actisa was born with a **clear social vocation**, its activities pretend the development of new infrastructures and new developments with a social interest, to improve the productive networks, providing the defense of the natural values, heritage and welfare.
